

Virtual Security Office Fact Sheet v2.2

All organisations need security expertise; many can't justify the costs nor require full-time support.

The salary of even a junior security professional can be close to or over six figures – when you factor-in hiring costs too, it really begins to add up.

The Privasec VSO gives you access to a range of experienced, senior security professionals at a fraction of the cost of finding and hiring your own resources.

ADDED VALUE

A Virtual Security Office is a cost effective way of improving your organisation's security posture with a tailored approach to ensure maximum ROI.

Only pay for the time your Virtual Security Office is working for you, not for any idle time.

Save on recruitment costs and beat the rising security industry salaries. Instead, gain access to a whole team of security experts, each with their specialisation and many years of experience in complex IT and business environments.

Looking for that perfect employee? Keep your project going and maintain your security posture while recruiting. Have a Virtual Security Office ready to come on-board as soon as your security resources resign and mitigate knowledge loss.

SKILLS ON TAP

Some of the skills that can be leveraged are:

- Strategic Skills for designing and implementing overarching governance frameworks, compliance roadmaps (ISO27001, ISM, PSPF, PCI DSS, APRA, etc.), developing & implementing information security policies/processes.
- Tactical Skills for security risk assessments, project security assistance, information security reviews, and audits.
- Operational Skills to make the most of your security tools, conduct user awareness, vulnerability management, penetration testing and keep track of your everyday posture.

HOW THIS SERVICE WORKS

1. You procure a set number of days at a flat daily rate. The more days you procure the lower the rate.
2. You are assigned a dedicated senior consultant corresponding to your needs and industry, who will become familiar with your business, technical infrastructure, and personnel. When your VSO is not actively working in your business, they are only a phone call or email away. You will also be able to access, as required, the rest of our team of security specialists.
3. All our programs are tailored to best fit your requirements and budget. Engagements range from weekly hands-on officers to quarterly advisory and tracking programs.

NEXT STEP

To understand if this will benefit you, start with a 30-minute session to discuss your current security maturity and objectives.
